DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 8, 12-14 and 17-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 4 and 12-14 of copending Application No. 10/337053. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1, 4 and 10 of the copending application recite the same scope with claim 1 of the present application, further claim 4 of the copending application recites the same scope with claim 8 of the present application, and further claims 12-14 of the copending application recite the same scope with claims 12-14 of the present application. As further called in for claims 17-20, it is seen as an intended use for using the charge pump circuit recited in the provisional application in a memory circuit.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Objections

3. Claims 2, 7 and 9 are objected to because of the following informalities: the limitation "the first PMOS transistor gate" in claim 2 should be --the gate of the first PMOS transistor--; "first NMOS transistor gate" should be --the gate of the first NMOS transistor--; and "the NMOS first transistor" in claim 9 should be --the first NMOS transistor--.

Allowable Subject Matter

4. Claims 2-7, 9-11, 15, 16, and 21 are objected.

Claims 1-21 would be allowable if rewritten to overcome the Double Patenting rejection or submit a Terminal Disclaimer.

Claims 1-21 would be allowable because the prior art fails to teach or suggest that a gate of the first NMOS transistor is boosted above VDD to quickly charge the boost capacitor before driving the output.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited as interest because they show some circuits analogous to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quan Tra whose telephone number is 571-272-1755. The examiner can normally be reached on 8:00 A.M.-5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Callahan can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
